Construction Management

Program Details

Associate Degree in Construction Management

Duration: 2 Years

Career focus: Industrial and green building practices

Overview

Massive federal investment in infrastructure is fueling a new construction boom. This means high demand for skilled construction managers, who oversee everything from scheduling to budgeting and modeling for complex building and renovation projects. Our associate degree program will give you a strong foundation in the construction industry, from reading construction plans to communicating effectively with diverse teams. This is an excellent program for students who are driven to lead and manage others. We're the only two-year program in the region whose students earn paid co-ops at top construction companies. The co-op includes a starting wage of at least \$20/hour and access to entry-level roles of \$80,000 a year or more. Why go to a four-year college when you can land the same job at a two-year college?

What You Will Learn

- AutoCAD
- Integrated project delivery methods
- Planning, budgeting, and scheduling systems
- Designing and analyzing construction documents
- Estimating job costs and requirements
- Identifying and explaining sustainability costs and benefits

Career Paths

- Construction Manager
- Superintendent
- Facilities Manager
- Cost Estimator
- Sustainable Construction Manager
- Field Engineer

Job Outlook

Jobs in construction management are expected to grow much faster than the average for all other occupations, especially in Greater Boston, with the industry expected to fill about 34,700 openings each year over the next decade. Construction processes and building technology are becoming more complex, requiring greater oversight and spurring demand for skilled construction managers. (Source: US Bureau of Labor Statistics)

AFFORDABLE, FLEXIBLE, ATTAINABLE EDUCATION

Your college education only pays off **if** you graduate and find a great career. Franklin Cummings Tech has the best track record — by a wide margin — among any 2-year college in MA in what comes next.

Top 4 Reasons to Choose Franklin Cummings Tech

1 Career-Focused

Most of our students build careers in high-demand fields, in roles where you will be paid well and can support your family. Many students report that they doubled their income as a result of their education. Also, with our co-ops, you can start working and earning in your field after only nine months of school.

2 Affordable

Our tuition cost is less than half of the average tuition at four-year non-profit colleges or for-profit technical schools in Massachusetts, and we provide over \$5M in additional aid. Here, you can enjoy school and the economic opportunities that come with a degree at a price you can afford.

3 Flexible

We offer day and evening classes to meet your schedule. Some programs take less than a year to prepare you for immediate entry into the workforce. When you're ready to continue your education, you can apply your 1-year certificate credits toward a degree.

4 Supportive

We offer small classes — with no big lecture halls — allowing you to receive the individualized attention you need to thrive. Success coaches provide you personalized support every step of the way, which is why most Franklin Cummings Tech students finish on time.

We are an Affirmative Action/Equal Opportunity institution that does not discriminate on the basis of age, race, religion, color, creed, national or ethnic origin, sex, sexual orientation, handicap, or disability in its education programs, employment, or in admissions to, access to, or treatment in its programs or activities.
